Management | Communication | Team Leadership

PROJECTS

Teleport 24/7
A courier Management app for three different platform
Most significant project which was developed individually by Java, Android, Laravel to use it in every platform.

CfL
Care for Love (A collaborative Project based on kotlin to identify and suggest Heart patients)
An innovative mobile application developed in Kotlin and Android, designed to identify potential heart patients through user input and medical criteria. This project showcased my ability to create intuitive interfaces and integrate complex algorithms for healthcare diagnostics

TeleportD 24/7
Database built for Courier Management purpose
All three previous project use this database which was developed for Third Year laboratory course

PROFESSIONAL EXPERIENCE

2023/04 – 2024/04	**CSE Association, KUET**
	General Secretary
	As General Secretary of the organization, I oversaw strategic planning, operational management, and facilitated cohesive teamwork to achieve organizational objectives effectively. My role involved fostering collaborative relationships, implementing impactful initiatives, and ensuring operational excellence, which significantly contributed to the organization's growth and success.
